Contents Volumes 302–303

Special Issue dedicated to Hans Schneider

R.A. Brualdi
Preface 1

R.A. Brualdi
A tribute to Hans Schneider 3

Publications of Hans Schneider 7

Ph.D. students of Hans Schneider 15

The 67 coauthors of Hans Schneider 16

L. Elsner and P. van den Driessche
On the power method in max algebra 17

J. Todd and R.S. Varga
Hardy's inequality and ultrametric matrices 33

M.I. García-Planas and V.V. Sergeichuk
Simplest miniversal deformations of matrices, matrix pencils, and contragredient matrix pencils. 45

S.H. Cheng and N.J. Higham
The nearest definite pair for the Hermitian generalized eigenvalue problem. 63

C.V.M. van der Mee, A.C.M. Ran and L. Rodman
Stability of self-adjoint square roots and polar decompositions in indefinite scalar product spaces 77

L. Lerer and L. Rodman
Bezoutians of rational matrix functions, matrix equations and factorizations 105

M.-T. Ho, A. Datta and S.P. Bhattacharyya
Generalizations of the Hermite–Biehler theorem 135

W.F. Trench
Asymptotic distribution of the even and odd spectra of real symmetric Toeplitz matrices 155

B.-Y. Wang, X. Zhang and F. Zhang
Some inequalities on generalized Schur complements. 163

Table of Contents continues

Table of Contents continued

D. Hershkowitz
The combinatorial structure of generalized eigenspaces – from nonnegative matrices to general matrices 173

B.-S. Tam and S. Yang
On matrices whose numerical ranges have circular or weak circular symmetry. 193

R.B. Bapat
Linear estimation in models based on a graph 223

R. Bhatia and K.B. Sinha
Derivations, derivatives and chain rules 231

R. Cantó and A.M. Urbano
On the Segre characteristic of a block triangular matrix. 245

T. Boros, T. Kailath and V. Olshevsky
A fast parallel Björck–Pereyra-type algorithm for solving Cauchy linear equations 265

T.J. Laffey and E. Meehan
A characterization of trace zero nonnegative 5×5 matrices 295

B.G. Zaslavsky and B.-S. Tam
On the Jordan form of an irreducible matrix with eventually nonnegative powers 303

D. Calvetti, B. Lewis and L. Reichel
On the selection of poles in the single-input pole placement problem 331

E. Boman and I. Koltracht
Computing preconditioners via subspace projection. 347

J.-J. Climent and C. Perea
Comparison theorems for weak splittings in respect to a proper cone of nonsingular matrices. 355

A.C. Robinson and D.W. Robinson
A best approximation evaluation of a finite element calculation 367

B.-S. Tam
On matrices with cyclic structure 377

Table of Contents continues

Table of Contents continued

R.A. Horn and D.I. Merino
The Jordan Canonical Forms of complex orthogonal and skew-symmetric matrices 411

A. Farkas, P. Rózsa and E. Stubnya
Transitive matrices and their applications 423

A. Nemirovski and U. Rothblum
On complexity of matrix scaling 435

W. So
Linear operators preserving the minimal rank 461

W.-W. Lin, V. Mehrmann and H. Xu
Canonical forms for Hamiltonian and symplectic matrices and pencils 469

W. Barrett, H.T. Hall and R. Loewy
A nonpolyhedral cone of class function inequalities for positive semidefinite matrices 535

L. Solomon
Similarity of the companion matrix and its transpose (with an Appendix by R.M. Guralnick) 555

B.N. Datta
Stability and inertia 563

G. Harel
Students' understanding of proofs: a historical analysis and implications for the teaching of geometry and linear algebra 601

D. Carlson and F. Uhlig
Report on the Educational Program at the Hans Schneider Linear Algebra Conference, Madison, Wisconsin, 3–6 June 1998 615

Author index to volumes 302–303 619
